

QUALITY POLICY

MISSION

Create value in a sustainable manner in the development of our activities:

- Manufacture of metal components through deep drawing.

VISION

- Evolve our technology to be able to manufacture new products for the automotive industry.
- Apply our technology to other sectors.

VALUES

MetDD bases all its actions on the following values that it considers essential to maintain its identity:

Loyalty on what we commit and what we do.

Commitment to the client to understand what brings value to him and focus on providing this value in everything we do.

Commitment to work ethics, integrity and honesty as well as compliance with the legislation that applies to us.

Confidence in our possibilities and knowledge.

Professionalism in our executions.

Perseverance in solving problems.

Honesty with the customer and with ourselves.

Responsibility when assuming our obligations.

Quality in our work and attitude as a starting point to achieve continuous improvement.

Innovate in work systems using anti-error systems.

Order in the execution of our work in a coordinated way.

Teamwork based on relationships based on trust and respect. This implies the commitment to align the facts with the words, listen to different opinions and communicate in an open and sincere way.
